Pizza Ordering System

Abstract

The objective and scope of my Project Pizza Ordering System is to record the details of various activities of users. It will simplify the task and reduce the paperwork. During implementation, every user will be given appropriate training to suit their specific needs. Specific support will also be provided at key points within the academic calendar. Training will be provided on a timely basis, and you will be trained as the new Pizza Ordering System is rolled out to your area of responsibility.

At the moment, we are in the very early stages, so it is difficult to put a specific time on the training, but we will keep people informed as plans are developed. The system is very user-friendly and it is anticipated that functions of the system will be easily accessed by administrators, academics, students, and applicants.

Hence, the management system for the College management has been designed to remove all the deficiencies from which the present system is suffering and to ensure.
